

SunTech Vet BP Product Comparison

Utilizing an animal-specific blood pressure (BP) algorithm with our motion-tolerant technology, SunTech is dedicated to providing you with the most advanced solutions for reliably and accurately assessing animal BP and vital signs – an important advancement for pets and vets!

Our product line allows you to choose the BP and vital signs solution that works for your veterinary practice. Whether you need BP for wellness check-ups or a

multiparameter monitor during procedures, we can find the solution for you.

The Vet20 is the simplest way to get a BP on an awake cat or dog. The Vet25 is designed to be flexible – for measuring BP in either the exam room or the operating room. The Vet30 combines our trusted BP technology with oxygen saturation and temperature monitoring for animals pre-, post-, or during a procedure.
